

LARSEN
COOPERATIVE

New Look on Farm, Same Great Formulation

CHS Larsen Cooperative is happy to announce they are providing milk replacer with feed support and formulation from Hubbard Feeds. This versatile line up provides a milk replacer to fit your needs.

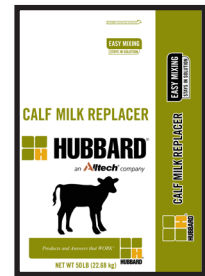

Milk Replacers

New Hubbard Instantized Line:

- Contains organic selenium yeast as a standard ingredient to support muscle development, normal immune function, resistance to disease and enhance overall calf nutritional status.
- MOS or mannan-oligosaccharides and essential oils containing specific plant extracts. Both supplements contribute to maintaining a favorable intestinal environment leading to optimizing nutrient utilization and growth.
- Amino acid balanced and utilize all-milk protein ingredients including highly digestible skim milk and whey protein sources.
- All are instantized for easy mixing and contain Bio-Mos®.

MOS

Bio-Mos® plays a critical role in animal nutrition and production. A unique product derived from a selected strain of Saccharomyces cerevisiae yeast using a proprietary process developed by Alltech, Bio-Mos is incorporated into animal diets to support overall animal performance. Effective during all phases of growth, Bio-Mos is designed to feed the gastrointestinal tract, thereby maximizing performance and profitability. Bio-Mos® is a registered trademark of Alltech.
