

SUNNYSIDE JUMBO BROILERS

Our line of Jumbo Broilers continues to impress customers with their strong legs, plump breasts, excellent feed conversion and livability. Managed properly, these fast-growing birds should reach 6 to 7 lbs. in only 8 weeks. Be amazed as you watch them grow!

Available year round

SUNNYSIDE RANGER

This slower-growing bird is perfect for alternative systems such as "chicken tractors" on pasture as they are excellent foragers. These red birds will take 9 to 11 weeks to finish and should average 5-6 lbs. each. Supplies are limited.

Available March 23 through August 17

WHITE LEGHORN

The Sunnyside White Leghorn is a premier producer of pearl white eggs, maturing early to provide dozens of eggs for you and your family. You can expect feed efficiency, great shell quality and excellent livability with these birds. Pullets are ready to lay at 20 weeks.

Available March - December

HERITAGE BREEDS

BARRED ROCKS

Easily recognizable by their contrasting black and gray plumage, the dual purpose Barred Rock has been a favorite of American farmsteads for over a century. Pullets will mature to be excellent layers and cockerels make for excellent table birds.

RHODE ISLAND REDS

This cherry-colored beauty has been a fixture in the Northeast for many generations. The traditional RIR has contributed to the development of many of today's commercial brown egg hybrids. Another great option for both eggs and meat.

Available March 16 through September 8

EXTRA SERVICES

Beak Trimming.....\$.15 per chick
Mareks Vaccination - included in the purchase price.

DUAL PURPOSE

BROWNS

Our Brown female has been bred to produce large volumes of high-quality, brown-shelled eggs. This brown hen with white under feathers will weigh around 5 lbs. and is known for its quiet temperament and hardiness. Males are a lighter in color and will mature to 5-6 lbs. at 20-22 weeks.

Available March - December

SPECIAL BLACKS

The Special Black is a Sunnyside original that combines the qualities of several heritage breeds, making it the ultimate dual-purpose hybrid. Most birds will carry a black plumage with traces of red in the hackles. Females are excellent brown egg layers and males should finish at 6-7 lbs. in 20 to 22 weeks. The preferred breed for many ethnic markets!

Available year round

REDS

Our hybrid Reds grow quickly and are excellent producers of brown eggs. These birds will mature to the same size as our Special Blacks. Females will be mainly brown while males will be a darker and more lustrous red than the hen. Limited supply.

Available year round

SUNNYSIDE RAINBOW EGGERS

Don't mistake these for Araucanas-Rainbow Eggers are a colorful collection of commercial layer strains from Europe that will fill your egg basket with a green, blue, chocolate brown and cream-tinted eggs. Supplies are limited so order fast!

Available March 16 through September 8

HOBBY FARM ASSORTED

Our Hobby Farm Assorted will include our Broilers, along with some combination of everything else we offer for chickens. The breeds and sex of the chicks included are hatchery choice- but we will do our best to provide you a good variety.

Available March 2 through September 8

DUCKLINGS

MALLARDS

These ducks make for an excellent addition to your pond and have a hardiness not found in other domesticated ducks. While they will dress out much smaller than other ducks, they do have a more traditional, "wilder" taste due to their preference to forage.

Available March 23 through June 17

WHITE PEKINS

Our most popular duck, the giant White Pekin is the premier meat-producing duck available. Hardy and fast growing, Pekins should finish out at 7 lbs. in 8 to 9 weeks. These snow white ducks will dress out nicely. A very attractive meat bird.

Available March 2 through June 17

ROUENS

While Rouens are similar in size to our White Pekins, they carry a plumage similar to that of a Mallard. Drakes will mature to be grey with green heads while females carry a brown penciled pattern. The traditional Rouen duck has been a staple on French farmsteads, and tables, for centuries.

Available March 2 through June 17

KHAKI CAMPBELLS

This medium duck matures quickly and is our most prolific egg-laying breed. Males will mature to over 4 lbs and can be identified by their olive-colored heads. Females will be smaller in size and should begin to lay eggs at 5-6 months of age.

Available March 23 through June 17

FERTILE HATCHING EGGS

Fertile White Leghorn hatching eggs are available for schools and research projects. Egg costs will vary, depending on the quantity of eggs you are interested in. Mailing and handling charges will be applied. Please call our office for details or to place your order.

STARTED PULLETS

Sunnyside offers ready-to-lay pullets, both white egg and brown egg varieties, that are available for pick up in August and September each year. We start taking orders in early March. Get your order in soon as supplies are limited!

TURKEY POULTS

BROAD BREASTED WHITE

If it's a fast-growing turkey with great livability and excellent feed conversion you seek, the Broad Breasted White is the one for you. Females will grow to 16-18 lbs. in 14-16 weeks, while Toms should finish out at 30 lbs. in 18-20 weeks.

Available March 16 through August 17

BROAD BREASTED BRONZE

While these beautiful turkeys resemble their wild cousins in plumage, their size and confirmation are more in line with our Broad Breasted Whites. Our traditional bronze does excellent in free range and other alternative systems as they make great foragers.

Available March 16 through August 17

BE CAUTIOUS WHEN HANDLING POULTRY

Live poultry can be a source of potentially harmful bacteria. The following are safe handling tips:

- Thoroughly wash hands with soap and water after handling poultry or anything in their environment.
- Clean poultry equipment frequently.
- Keep live poultry and their equipment outside of your home.
- Do not eat or drink around poultry or their environment.
- Supervise children when they handle poultry. Make sure that they do not put hands or fingers into their mouths.
- Young children under the age of five and those with weakened immune systems should be cautious when handling poultry.
- Do not nuzzle or kiss poultry.

MANAGEMENT TIPS FOR BABY CHICKS

Make sure their environment is warmed up to 90° F upon their arrival. The temperature can be reduced by 5° F per week until you reach 70° F. Give your birds plenty of space and remember that comfortable chicks will be spread out evenly under the light/brooder. One 250-watt lamp for every 80 chicks, placed 18-24 inches off the floor, is a good rule of thumb.

Litter must remain clean and dry. Wood shavings, peat moss and rice hulls work best. Avoid using newspapers and straw for bedding as these can be susceptible to mold and can become slippery, which may cause leg problems. Circulate fresh air in the growing area to prevent ammonia build up. Young chicks can be protected by a draft guard early on to protect them from being chilled.

Feed and water chicks immediately upon arrival. Provide at least one gallon of water per 50 chicks. For best results, include a vitamin and electrolyte powder in their water founts. A fine grade grit may be sprinkled on top of their feed- this will aid in their digestion.
