

New London Farm Store Testimonies

I came to these folks for the expertise that they offer as well as the product that they offer.

Bill Bishop, New London Resident

“This project required more than 2600 tons to fill in the hill. We had extended the driveway and parking area about 24 feet by 60 feet and over 15-18 feet deep. There is an extremely steep edge on the south side that is in the wooded area that is almost full shade. The other area is in direct sunlight and relatively flat. I went and spoke with Randy, CHS Retail Manager, as I was looking for more than just “seed” to throw down. I shared that I had a very steep shaded area that I needed to hold the soil in place, and I had a very flat “full sun” area. The project went very well and all the soil is held in place. Like I said previously I came to these folks for the expertise that they offer as well as the product that they offer. Thank you very much.”

Bill Bishop, New London Resident

Thanks again for all your hard work and efforts in putting this event on.

Don Burrows, New London Resident

“We all enjoyed the Food Plot Seminar. You all did a great job and the people I was with, didn’t stop talking about it all the way home. We all enjoyed it very much. Both speaker guests were not only informative but also very entertaining. I already used my free gift card and bought some seed before leaving but I’m planning on returning in the future as soon as I figure out what other supplies I’ll need for the year. Thanks again for all your hard work and efforts in putting this event on. We very much appreciate it.”
